Dear Educator/Parent,

Welcome to the Center for Puppetry Arts and this production of *The Headless Horseman of Silly Sleepy Hollow* by Frogtown Mountain Puppeteers of Bar Harbor, Maine. We’re delighted you’re joining us for this live puppet theatre experience!

*The Headless Horseman of Silly Sleepy Hollow* is a delightful retelling of the classic Washington Irving tale, performed by a trio of puppeteer siblings from the New England area of the United States. This fast-paced, comedic show is the perfect accompaniment to a thematic unit on folk tales, autumn holidays, horses, the harvest, and rural American history – and is a great example of visual, musical, and dramatic arts.

It has been proven (through test scores and numerous studies) that the arts

- invite empathy and interaction
- stretch the imagination
- develop important coordination and language skills (emotional and spoken)
- satisfy educational objectives across the curriculum
- support literacy and writing
- enhance social skills such as problem solving, turn-taking and active listening
- impact attendance in a positive way
- improve motivation and behavior
- and simply allow children to have fun (they’re called “plays” for a reason, after all!)

This Educational Companion can be used to enhance the educational opportunities provided by this show. Though an excellent way to prepare for the experience of seeing a live puppet theatre production, this information can also be used as a springboard for follow-up fun after the curtain has gone down. This performance supports educational standards across the curriculum, and is a great deal fun, too!

To access the Georgia Performance standards for this show that correlate to each programming area at the Center (performance, Create-A-Puppet Workshop, and Museum exhibits) click the links below:

- *The Headless Horseman of Silly Hollow, P-K & K*
- *The Headless Horseman of Silly Hollow, Grade 1*
- *The Headless Horseman of Silly Hollow, Grade 2*
- *The Headless Horseman of Silly Hollow, Grade 3*
- *The Headless Horseman of Silly Hollow, Grade 4*
- *The Headless Horseman of Silly Hollow, Grade 5*

Enjoy the show!

Sincerely,

Aretta Baumgartner
Education Director

The Center for Puppetry Arts® is supported in part by:

- Fulton County Arts & Culture
- Georgia Council for the Arts
- National Endowment for the Arts
- Aetna Foundation
- PNC Bank
- Coca-Cola Foundation
- The Zeil Foundation, Inc.

The Center for Puppetry Arts® is a non-profit, 501(c)(3) organization and is supported in part by contributions from corporations, foundations, government agencies, and individuals.

Major funding is provided by the Fulton County Board of Commissioners under the guidance of the Fulton County Arts Council, and by the City of Atlanta Mayor’s Office of Cultural Affairs. These programs are also supported in part by the Georgia Council for the Arts through the appropriations of the Georgia General Assembly. GCA is a partner agency of the National Endowment for the Arts.

The Center is a member of Theatre Communications Group (TCG), the national organization for the American theatre; Theatre for Young Audiences (TYA/USA/ASSITEJ); and International Performing Arts for Youth (IPAY).

The Center also serves as headquarters of UNIMA-USA, the American branch of Union Internationale de la Marionnette, the international puppetry organization.

PRE-SHOW ACTIVITIES / DISCUSSIONS

WHAT IS A PUPPET?
A “puppet” is an inanimate (non-living) object that is brought to life by an outside force (usually a human being working as a performer) in order to tell a story.

The Headless Horseman of Silly Sleepy Hollow showcases one particular style of puppetry: mouth and rod puppets (or moving mouth puppets). This is sometimes called “Muppet-style puppetry,” too, as this style was made popular by Jim Henson and his Muppets. There are twenty (20) hand-in-mouth and rod puppets in this show, all made in Frogtown Mountain’s puppet studio in Bar Harbor. The puppets are made from felt, fleece, and other soft fabrics. Frogtown’s puppet builders sketch a design of the character, translate the sketch into a pattern form, trace it onto material, and sew the pieces together on a sewing machine. Then features (eyes, nose, hair, etc.) are added using a hot-glue gun. Ping-pong, wooden, or styrofoam balls are used for eyes, with paint markers creating the iris and pupil of the eyes. More felt can be used for ears and noses, sometimes with cardboard underneath to help add shape. Yarn or wigs is/are used for hair, and the puppets are usually costumed in baby or toddler clothes that are purchased at thrift stores. Metal rods (insulation rods from the hardware store) are attached to their hands so that the puppeteers can control their arm and hand movements.

There are also some shadow puppets used in The Headless Horseman of Silly Sleepy Hollow. People all around the world have been using shadow puppetry to tell stories for many centuries. Shadow puppets are cutout figures held between a source of light and a translucent screen. In this show, red and yellow light bulbs are used for the source of light, and a sky-colored bed sheet is used for the translucent shadow screen. The actual shadow puppet is not seen by the audience, just the shadow it creates. Frogtown makes their shadow puppets out of either cardboard or stiff paperboard. First they cut out the shape of the puppet, then they attach stiff wires or rods that are used to manipulate the puppet. Sometimes they use brass metal fasteners to give the shadow puppet moving parts.

• DISCUSSION: Ask the children what puppets are. Have they seen them before? Are they real or pretend? What can be used as a puppet? Out of what materials can puppets be made, and why would you choose some materials over others for certain projects? Have you ever made your own mouth puppets or shadow puppets?

WHAT IS A PUPPETEER?
A performer who uses a puppet or puppets to tell a story is called a “puppeteer.”

There are three puppeteers in The Headless Horseman of Silly Sleepy Hollow: Brian Torbek, Erik Torbek, and Robin Torbek-Erlandsen. They are siblings (two brothers and one sister) and have toured and performed together since the year 2000.

• DISCUSSION: What skills does it take to be a puppeteer? What are some challenges that the Torbecks might face as brothers and a sister traveling together, living together and working together? What things would be easier for them as they work and travel because they know each other so well? Ask your students about the things that they have in common with their siblings (or other family members) that could lead to working together or creating together.
WHAT IS AN AUDIENCE?
Being a good audience member is as important as being a good puppeteer! It takes teamwork between audience and puppeteer/actor to make a show successful. There are “rules of etiquette” that need to be employed, such as:

- **A LIVE SHOW IS DIFFERENT THAN TV OR MOVIES.** It’s okay to have fun, but do remember that the people on-stage (and in the audience) can hear you—be polite!
- **MAKE SURE EVERYONE CAN SEE.** Stay seated so the audience members behind you can see the show.
- **BE SUPPORTIVE.** The way audience members show they like something is to applaud. Make sure to applaud if you appreciate what you see and hear. Between songs or scenes, after the show, and after the post-show demonstration are appropriate places/times to show your appreciation.
- **LISTEN CLOSELY.** It’s important that you hear all the details of the story so that you can enjoy it fully.

**DISCUSSION:** Review the “rules” of being a good audience member. Role play what is appropriate and what is not.

WHAT IS THE STORY WE’LL SHARE (THE STORY SYNOPSIS)?
The Headless Horseman of Silly Sleepy Hollow puppet show is a comedic version of the classic Washington Irving tale, “The Legend of Sleepy Hollow.” Based loosely on the original story, this re-telling involves a bumbling Headless Horseman, his wisecracking horse, the meat-head Brom Bones, the lovely Katrina Van Tassel, her ostentatiously rich father, and the mild-mannered and lovable protagonist, Ichabod Crane. Ichabod befriends the hapless, headless ghoul, and advises him in his search for a suitable replacement head. Meanwhile, a jealous Brom Bones tries to run Ichabod out of town while they both vie for the affections of Katrina. In the end, the Horseman saves the day and everyone ends up happily ever after.

**DISCUSSION:** Read the story out loud to the class using one of these online versions:

WHO CREATED THE PUPPET SHOW?
Frogtown Mountain Puppeteers is a puppetry troupe based in Bar Harbor, Maine; comprised of three siblings Erik Torbeck, Brian Torbeck, and Robin Torbek-Erlandsen. Founded in 2000, Frogtown Mountain Puppeteers has performed all over the United States at festivals, schools, libraries, and theaters. Their production of The Headless Horseman of Sleepy Hollow has been presented at the Puppeteers of America Regional Festival in Maryland, the Puppet Showplace Theatre in Brookline, Massachusetts, and Puppets Up International Festival of Puppets in Ontario, Canada.

**DISCUSSION:** Visit the website of the Frogtown Mountain Puppeteers. View photos from the show in the “Photo Gallery” and discuss which characters you think are represented in the photos. What impressions of their personalities do you get from the images? [http://frogtownpuppets.com](http://frogtownpuppets.com)
LEARNING ACTIVITIES

Learning Activity, P-K & K: How do pumpkins grow?

Objective: Students will understand the life cycle of a pumpkin and practice sequencing.

Materials: sentence strips, display board, sequence drawing sheets (one per student), crayons

Procedure:
1. Prepare sentence strips with the following statements:
   
   Plant the seeds.
   A vine begins to grow.
   Green leaves form on the vine.
   Pumpkin flowers grow on the vine.
   A little green pumpkin starts to grow.
   The pumpkin grows and turns orange.
   Time to pick the pumpkin.

2. Read the sentence strips aloud to the students in sequential order. Have them repeat each sentence after it is read.

3. Rearrange the sentences so that they are out of sequential order. Ask students to help you put them back in the correct order, and post them in that correct sequential order on the display board.

4. Have students draw a picture of each of the steps of the sequence on their sequence drawing sheet. Provide assistance as/if necessary reinforcing the steps of the sequence.

Assessment: Meet with students one-on-one and confirm that their pictures match the sequences. Remediate if necessary.
## Sequence Drawing Sheet

Learning Activity, 1st & 2nd Grade: Enjoy a pumpkin float!

Objective: Students will use graphing to predict floatability of pumpkins (and/or other vegetables) and will learn the definition of “density.”

Materials: chart paper and marker (or chalk board, dry erase board or SMART Board), pumpkin cutouts, crayons, scissors, tape, sand pail (or bucket), trash bag or drop cloth, water, small pumpkin (and/or other vegetables)

Procedure:
1. Set up a trash bag/drop cloth, and place on it a bucket half-filled with water. Place pumpkin nearby.
2. Xerox one pumpkin cutout per student (example on the bottom on this page).
3. Label a chart page (or chalk board, dry erase board or SMART Board) with the question “Do pumpkins float?” Make a column for “yes” (yes, pumpkins DO float!) and a column for “no” (no, pumpkins DON’T float).
4. Distribute pumpkin cutouts and crayons. Have children color (and carefully cut out, if applicable) one pumpkin each.
5. Ask students to predict whether or not the pumpkin will float, and have them tape up their pumpkin in the appropriate column on the chart. Discuss why the choices were made, and count the number of students who predicted “yes” and predicted “no.” Discuss the terms “majority” and “minority” (and how these terms are related to the more-familiar terms “more”/“greater than” and “less”/“less than”).
6. Place pumpkin in water and watch results. Discuss that it’s DENSITY, not WEIGHT, that determines floatability of objects. DENISTY = how weight is distributed across an item.
7. VARIATIONS: This activity can be done in small groups and/or with other vegetables. It can also be done with a series of pumpkins and buckets, ranging from small pumpkins/buckets to large pumpkins/buckets.

Assessment: Quiz students on the terms “density,” “majority” and “minority” after a few weeks have passed to see if they have retained the information.
Learning Activity, 3rd & 4th: Mapping Sleepy Hollow

Objective: Students will create story maps and character maps in order to better understand the structure of an effective story and the creation of strong characters within that story.

Materials: paper and pencil for each student, chart paper and marker (or chalk board, dry erase board or SMART Board), and synopsis of story (see page 3 of this Guide for a short synopsis and links to in-depth synopsis)

Procedure, Story Map:
1. Label chart paper (or chalk board, dry erase board or SMART Board) with the terms
   -beginning
   -topic
   -characters
   -setting
   Leave space after/between each word for answers. Have students do the same on their own paper.

2. Discuss these terms with the students. Have students discuss and identify the beginning of the story in one sentence, and write this down. Discuss and identify what the topic (main idea) of the story is and write this down. Do the same for characters and setting.

3. Label your display board with the terms
   -middle
   -event 1
   -event 2
   -event 3
   (and other events as identified/necessary)

4. Discuss these terms with the students. Have students discuss and identify the middle of the story in one sentence, and write this down. Discuss and identify what the events of the story are and write them down.

5. Label your display board with the terms
   -climax
   -conclusion

6. Discuss these terms with the students. Have students discuss and identify the climax of the story in one sentence, and write this down. Discuss and identify what the conclusion of the story is and write this down.

7. Review with the students, having students take turns reading their work out loud.

Procedure, Character Map:
1. Label chart paper (or chalk board, dry erase board or SMART Board) with the terms
   -character's name
   -character's actions
   -character's emotions
   -character's dialogue
   Leave space after/between each word for answers. Have students do the same on their own paper.
2. Discuss these terms with the students. Have students discuss and identify the character elements for each of the story’s main characters: the Headless Horseman, the Headless Horseman’s Horse, Brom Bones, Katrina Van Tassel, Katrina’s father, and Ichabod Crane.

3. Review with the students, having students take turns reading their work out loud.

**VARIATIONS AND ADDITIONAL APPLICATIONS:**
*If this activity is done before the show, revisit your work after the show and compare the version of the story you saw with the version of the story you read before attending the show.

*Have students draw pictures of the story map—this is called a “story board” and is used when puppet shows are created. Story boards are used to cement visual images of the important parts of the show and are especially useful to scriptwriters and to set/scenic designers.

*Have students draw pictures of the characters—these are called “character sketches” and are used when creating puppet designs.

**Assessment:** Quiz students on the terms used in this activity after a few weeks have passed to see if they have retained the information. Apply these same techniques to other stories shared in class.
**Learning Activity, 5th & 6th: Mapping your own tale!**

**Georgia Performance Standards covered, Grade 5:** English and Language Arts (Reading and Writing) ELA5R1, ELA5W2

**Georgia Performance Standards covered, Grade 6:** English and Language Arts (Reading and Writing) ELA6R1, ELA6W1, ELA6W2

**Objective:** Students will create story maps and character maps in order to better understand the structure of an effective story and the creation of strong characters within that story. After a review of some different genres of literature, students will create their own story in the genre of their choice following the conventions/elements of effective writing (as displayed through the use of story and character mapping).

**Materials:** paper and pencil for each student, chart paper and marker (or chalk board, dry erase board or SMART Board), synopsis of story (see page 3 of this Guide for a short synopsis and links to in-depth synopsis), “Mapping Sleepy Hollow” activity from pages 7 and 8 of this Guide

**Procedure:**
1. Have students complete the “Mapping Sleepy Hollow” activity (pages 7 and 8 of this Guide).
2. Review familiar genres of literature with the students:
   - **FOLKTALE** - A story or legend forming part of an oral tradition.
   - **LEGEND** - A traditional tale handed down from earlier times and believed to have an historical basis.
   - **FABLE** - A short narrative making a moral point. Often employs animals with human characteristics (powers of speech, etc.) as the main characters of the story.
   - **FAIRY TALE** - A fanciful tale of legendary deeds and creatures, usually intended for children.
   - **TALL TALE** - An extravagant, fanciful or greatly exaggerated story. Usually focuses on the achievements of the ultimate hero.
   - **MYTH** - Traditional, typically ancient stories dealing with supernatural beings, ancestors, or heroes that serve as a fundamental type in the worldview of a people. The purpose of myths is to account for the origins of something, explain aspects of the natural world or delineate the psychology, customs, or ideals of society.

   **PLEASE NOTE:** Exact definitions of these terms vary. Not every story will fall into exactly one category, and some stories belong in multiple categories. Many experts consider legends, fables, fairy tales, tall tales, and myths to fall under the broader category of “folktale.” The above definitions were found on the American Folklore website: [www.americanfolklore.net](http://www.americanfolklore.net)

3. Share one or two sample stories from each genre; either read the stories aloud or have students read them on their own or in small groups. Ask students to think about the elements of each story as they listen or read. Provide the following questions to guide students to some of the elements to look for:
   - Does the story tell about something real?
   - Could the story’s events be real, or are they totally unbelievable (fiction)?
   - Are the characters human or animal?
   - If the characters are human, could they have been real people?
   - Are characters doing things that are typically human or are they doing things that are superhuman?
   - Does the character face a problem that must be solved?

© 2014 Center for Puppetry Arts®. All Rights Reserved.
Does the story teach a lesson?
Can you tell when and where the story takes place, or could it be taking place anytime and anywhere?
Does the story take place long ago?
Are the people in the story ordinary/common people, or are they royalty?
Is there any mention of God or gods in the story?

4. Discuss *The Legend of Sleepy Hollow* as it relates to genre categorization. What genre is *The Legend of Sleepy Hollow*? Even though it has the word “legend” in its title, *The Legend of Sleepy Hollow* is generally considered a folktale. Why?

5. Have each student pick a genre to explore. Using the organizational tools of story mapping and character mapping, have each student work on his/her own story.

**Assessment:** Quiz students on the terms used in this activity after a few weeks have passed to see if they have retained the information. Apply these same techniques to other stories shared in class, and/or have students apply the techniques to each other’s stories.
ADDITIONAL LEARNING AND ENRICHMENT OPPORTUNITIES

Being Yourself
What did Ichabod learn about self-confidence and individuality? Was his journey of self-discovery easy or difficult? Have you ever felt confused or lost like he did? Have you ever felt bullied? Talk about bullying – what it is, how it makes others feel. A great website to use as a guideline for discussions about bullying can be found here: http://www.stopbullying.gov/kids/index.html. Think about what is unique and special about you. Share this with a classmate, and ask him/her to add to the list. Write simple poems or sentences about what makes you different from each other and how/why you should be proud of the person you are/are becoming.

CURRICULUM CONNECTIONS: Physical Education (Personal and Social Behavior)

Emotions
Do different appearances reflect different emotions? The Headless Horseman tries on several different heads throughout the show. How does he change his heads? Each of the heads has a thin wire attached to the bottom of it, and the Horseman puppet has a small hole on the top of his neck. The puppeteer can stick his/her finger through the hole in the Horseman’s neck and loop it through the wire on the bottom of the heads, thereby holding the head onto the Horseman with his/her index finger. The Horseman tries on a scarecrow head, a coffee can head, and, lastly, a pumpkin head. Each of these heads makes the audience think or feel a certain way. Which head did you like the best? Which head was the scariest? Which head was the silliest?

CURRICULUM CONNECTIONS: Physical Education (Personal and Social Behavior)

Fitness
Have students recall what actions Ichabod went through as he set out to solve the mystery of the Headless Horseman (examples: running, jumping, dancing). Invite them to try these activities so that they might improve muscular strength and cardiovascular endurance. Picture the horse, and imitate his movement. Now try moving like some of the other characters (Brom, Katrina, the sheep). What other movements can you do to imitate characters in other popular fairy tales and/or animals in nature?

CURRICULUM CONNECTIONS: Physical Education, Science

Math Fun
There are many ways to explore math using the performance as an inspiration. Recall all the puppet characters in the play, and organize them in terms of size, guessing which might be tallest, which might be shortest, and which might be similar in size (greater than, less than, equal to). Count the total number of puppets in the show (animals as well as humans). What percentage were human, and what percentage were animals? What other math games can you create using the show and/or its characters as a jumping-off point?

CURRICULUM CONNECTIONS: Mathematics

Holidays and Seasonal Celebrations
How is The Headless Horseman of Silly Sleepy Hollow a celebration of seasons and/or holidays? Do you see anything that might represent autumn in the show? How about Halloween? A pumpkin is used in the show as both a symbol of autumn and a costume piece. A pumpkin used in this way (with a face carved into it) is called a jack-o’-lantern. Where did the term come from? What are other meanings of the term jack-o’-lantern? Do you use jack-o’-lanterns in your autumnal celebrations? What other seasonal traditions do you and/or other people you know have?

CURRICULUM CONNECTION: Social Studies
Places and People

What parts of the story made you think/know it was set in 1790 in Connecticut? Talk about the costumes, scenery, and characters and how they are representative of that time period and place. Take a moment to focus especially on the schoolhouse and the students. How were schools then different from our schools today? How were they/are they similar? What things do we have in our classrooms now that they did not have in the one-room, all-ages schoolhouses in the late 1700s/early 1800s? How do these differences affect the way that teachers teach and that students learn?

**CURRICULUM CONNECTION: Social Studies**

Plants and the Harvest

Have your students explore some of the history behind pumpkins. Where did pumpkins originate? When were they first raised and harvested? By whom? What things are needed for pumpkins to grow effectively, and what is the life cycle of the pumpkin plant? Brainstorm a list of different ways pumpkins are used (in recipes, decorations, etc.). Brainstorm a list of popular stories/poems/movies that feature pumpkins (*Cinderella, Peter Peter Pumpkin Eater, A Nightmare Before Christmas*, etc.). Play “true or false” or “multiple choice” with these fun pumpkin facts:

- Pumpkins can vary in color from white to yellow to orange.
- Pumpkins contain vitamin A and potassium.
- Pumpkins are an ingredient in pies, breads, soups, and other foods.
- Pumpkin seeds can be roasted for a snack.
- Pumpkins are used as feed for some farm animals.
- Most pumpkins weigh about 15 - 30 pounds. Still, some weigh as much as 800 pounds.

**CURRICULUM CONNECTIONS: Science, Social Studies**

Puppetry

How are puppets brought to life? How are puppet shows created? Have the students create a puppet show using objects they can find in the classroom and/or in their desks. Have them each bring in one kitchen utensil from home (marked with their name on masking tape!) and brainstorm how to re-create a favorite fairytale using these utensils.

**CURRICULUM CONNECTION: Theatre Arts**

Sound Effects

What sound effects are used in the show to help create mood and atmosphere? The puppeteers most often create these sound effects by making noises during the show just with their mouths. Examples include the noises made when a puppet falls down, the sound of the sheep baa-ing, and the sound of the horse neighing. The sound of the school bell is created by banging a wooden spoon on a frying pan, and the sound of footsteps in the leaves is made by the crinkling of a paper bag. For the sound of the horse galloping, two halves of a hollowed-out coconut are knocked together repeatedly. What sound effects can you make using objects you have at hand?

**CURRICULUM CONNECTIONS: Fine Arts/Music, Fine Arts/Visual Art**

Spelling

What fun can you have with the letters of the word “pumpkin”? Give each student the letters P-U-M-P-K-I-N, and ask them to make (and define) the following words: ink, kin, nip, pin, pip, pun, pup, punk, pink, mink, pump. What other words can you and your students make with those letters?

**CURRICULUM CONNECTIONS: English and Language Arts**

Storytelling

How are stories written? How can a story be told? Have the children draw a series of pictures to illustrate what happened in the story. Add simple captions. This is called a “storyboard” and is often the way a play or a movie is created! Have the children act out what they remember, allowing different children to take on different roles (including scenery so all have a part to play!).

**CURRICULUM CONNECTIONS: Theatre Arts, English Language Arts & Reading, Fine Arts**
